## **FOR IMMEDIATE RELEASE**

### **JOURNÉE LED TRACK SYSTEM INSTALLED AT *CHICAGO CENTER FOR GREEN TECHNOLOGY***

**WESTLAKE VILLAGE, CA – (January 20, 2008)** – Journée Lighting revealed today that the LOTUS LED luminaire system was selected as the primary track lighting system for the Greenbuild Chicago 2007 Legacy Project, the *Chicago Center for Green Technology*. The LOTUS was chosen for its stylish, high-tech aesthetic design, long lamp life, and its high lumen, high CRI white-light output.

The inclusion of the LOTUS by Journée reflects the aspirations for making the *Chicago Center for Green Technology* an inviting and leading resource for green building information in the region. The Lotus exceeds the LEED sustainable and energy efficiency standards. It is an innovative measure propelling the City of Chicago toward becoming the greenest city in the nation.

Today, the *Chicago Center for Green Technology* continues to receive rave reviews over its recent expansion and renovation as it serves to educate nearly 20,000 design and construction professionals and property owners annually in how green technology can be cost-effective, aesthetically pleasing and good for people and the environment.

“Journée Lighting was honored to be a part of the renovation of the Chicago Center for Green Technology where fresh thinking is encouraged and green product innovation like the LOTUS LED luminaire system are embraced,” says Clayton Alexander, founder and CEO of Journée Lighting.

Starting from the outside in, the fins of the LOTUS design are not only distinctive and eye-catching but also dissipate any heat from the high-power LED light source. Instead of treating the LED as an MR-16 bulb replacement in a pre-existing incandescent luminaire, the LOTUS is an MR-16 type fixture designed around the LED light source.

--MORE--

Journée's LOTUS luminaire is the only LED-based luminaire on the market equipped with on-board WattageAdjust®. This unique feature provides users with the unexpected choice and flexibility to toggle between three adjustable brightness settings (6W, 11W, 16W) with a simple three position switch inside each LOTUS luminaire.

About Journée Lighting, Inc.

Headquartered in Westlake Village, California, Journée Lighting, Inc. designs and manufactures pure white-light LED-based lighting fixtures, including the LOTUS. The fixtures are available in an anodized aluminum finish in seven color options as well as in custom colors. Journée also designs and manufactures specification grade Monorail and Monopoint systems for use with its LED Luminaires.
