**Journée Lighting Featured in Sycamore House**  
*Energy Saving Fixtures Installed in Environmentally Friendly Home*

**(WESTLAKE VILLAGE, Ca.)** – Journée Lighting Inc. announces that the Sycamore House, designed by Michael Kovac, has selected the *Azara* LED Luminaire to light the spaces within the eco-friendly walls of this LEED Platinum home.

The Sycamore House is a modern-style ridge top residence in the Pacific Palisades that serves as a laboratory for Kovac Architects' ongoing research into ecological design. It has just recently become one of the first in California to acquire a Platinum Certification from the USGBC LEED for Homes Program. Michael Kovac, principal architect of Kovac Architects, Inc., selected Journée's *Azara* Luminaire for both its practicality and design.

"For my own recently completed LEED Platinum home [the Sycamore House], I was looking for very high efficiency lighting that was flexible enough to both light art well and provide warm general lighting for the main living space," says Kovac. "Journée's new *Azara* fixtures are absolutely perfect - in addition to more than fulfilling my requirements, the fixtures themselves are beautifully designed and crafted objects of functional art."

Spread out across 36 linear feet of low-voltage monorail track, the *Azara* luminaire not only appeals to the eye, but performs as a heat sink, resulting in longer lamp life and higher efficiencies. This sleek high-tech luminaire provides a color temperature of 2700k and 50,000 hours of lamp life, providing a stylish, energy-efficient fixture for any lighting function.

Drawing only 10 watts, Journée Lighting's *Azara* LED Luminaire is an LED-based fixture making energy-efficient track lighting possible. Unlike other high-efficiency light sources, such as compact fluorescent and metal halide, Journée's LED luminaires boast a lamp life of 50,000 hours and contain no mercury and no lead, which make them exceptionally eco-friendly.

"We were thrilled to be a part of this exciting residential project," states Clayton Alexander, President and CEO of Journée Lighting, Inc. "Being the top choice for the LED track lighting needs throughout this highly innovative, LEED certified home was an absolute honor for us."
